

Washroom

We offer a comprehensive and hygienic service for hand washing and drying.

Roller towel cabinets

Our modern, slim and compact towel cabinets are designed to be installed anywhere in hotels, offices or factory locations. Users obtain a clean, fresh and sterilised section of towel every time the cabinet is operated. Each 40-metre woven towel made of 100% cotton dispenses up to 200 clean sections of towel with no mess or hygiene hazards. There is always one towel in use in the towel cabinet, one in reserve, and one being laundered. No capital outlay or deposit is required. Our representative will install the towel cabinet in your position of choice.

Soap dispensers

CLS dispensers offer a hygienic and efficient way of providing soap for hand washing. A range of soaps is available to meet the needs of offices, catering establishments and industrial applications.

Air fresheners

Wherever and whatever odours occur, our elegantly designed air fresheners will eliminate the problem. A silent fan controls a pleasant fragrance, sanitising the area. A range of individual fragrances is available to suit your needs. The units are recharged and serviced by cls van drivers on a regular basis
